

Steven N. Goodman, M.D., Ph.D.

Dr. Goodman is Associate Professor of Oncology, Pediatrics, Epidemiology and Biostatistics at Johns Hopkins Medicine and the Johns Hopkins Bloomberg School of Public Health. He is also a faculty member at the Johns Hopkins Phoebe R. Berman Bioethics Institute and the Johns Hopkins Center for Clinical Trials, Co-Director of the Doctoral Program in Epidemiology, Editor-in-Chief of *Clinical Trials: Journal of the Society for Clinical Trials*, Statistical Editor of the *Annals of Internal Medicine*, scientific adviser to the national Blue Cross-Blue Shield Technology Assessment Program, and a member of the Medicare Coverage Advisory Committee. Dr. Goodman directs Project ImpACT, whose goal is to find and profile the most important randomized controlled trials of the 20th century. He has served on numerous Institute of Medicine panels and was a consultant to the President's Advisory Commission on Human Radiation Experiments. Dr. Goodman's interests are in inferential and ethical issues in clinical research.
